DUPLEX Inter-H

Brand new decentral ventilation unit with heat recovery for under-ceiling installation

Determination

Indoor ventilation units DUPLEX **Inter-H** are designed for balanced-pressure ventilation in classrooms, open area offices, facilities, restaurants, retail units and everywhere else where direct installation to the areas where the low noise is required.

Basic description

The units have high heat recovery efficiency, very low noise levels, low installed power input and minimum installation and design planning requirements.

The units are produced in two sizes: **DUPLEX 770 Inter-H and 1000 Inter-H**.

The units are fitted with the top-of-the-range ATREA aMotion control system for running all necessary functions.

DUPLEX Inter-H units include flexibly mounted EC fans, a counterflow heat recovery exchanger; a slide-out supply air filter; a heat recovery exchanger bypass, self-powered shut-off dampers and a control box. The drainless condensate pan is heated using an electric cell with automatic switching function.

In the unit there are placed splitter acoustic attenuators, exhaust and supply filter and integrated CO_2 sensor as a standard.

### Compliance with European standards

- Commission (EU) Regulation No. 1253/2014 (Ecodesign) for 2018
- Casing characteristics according to EN 1886
- EC motors compliant with ErP 2015
- Hygienic design according to VDI 6022

ErP 2018 Atrea

VDI 6022 READY Atrea
Advantages of DUPLEX Inter-H units

- The most silent school unit on the market – sound pressure 29 dB(A) at a flow rate of 650 m^3/h
- Air flow up to 1100 m^3/h
- High heat recovery efficiency of up to 93 %
- Height only 550 mm
- Demanding condensate drainage eliminated (!)
- Integrated preheater as standard included in the unit price
- Integrated infrared CO_2 sensor included in the unit price
- 4 options of the connection port position (to be decided at the installation)
- An option for unit to be partly installed in the suspended ceiling (to be decided at the installation)
- Quick and easy installation – original installation kit
- Unit to be split into 2 parts for easier handling and manipulation (through the door)
- Interior design – additional cladding option installation after the unit has been commissioned after the very final phase of the construction works
- Optional reheater – easily to be fitted additionally
- Full bypass for free-cooling (heat recovery exchanger is 100% bypassed)
- Built-in aMotion controls – web server, ModBus, remote service access, alarm notification, optional controllers
- Service switch – disconnects the unit from power supply
- Limit switch (automatically switches off the unit when the door is opened)
- VDI 6022 – manufactured in full compliance with requirements

OPERATING MODES
1. equal pressure ventilation with heat recovery

2. night precooling via by-pass in summer time

➡ ODA (e₁)...fresh air inlet
➡ SUP (e₂)...fresh air outlet
➡ ETA (i₁)...exhaust air inlet
➡ EHA (i₂)...exhaust air outlet

SELECTION SOFTWARE

For the detailed design of DUPLEX series units, accessories and control systems we recommend using our dedicated design software. You can find it on our website at **www.atrea.eu**.

HANDLING SPACE

DUPLEX Inter-H units must be installed with the prescribed handling space around the unit in mind.

Handling space under the unit must be maintained for opening the front door, replacing filters and providing servicing and installation access to each unit part.

Each drawing shows the minimum handling space.

DETAIL OF INSTALLATION AND FACADE PENETRATION

MOUNTING OPTIONS:

**WALL MOUNTING
(MOUNTING KIT - COMPLETE A351010)**
**MIDDLE ROOM MOUNTING
(MOUNTING KIT - SMALL A351009)**
1   DUPLEX Inter-H

2   Suspension rail *
the connecting material for mounting the suspension rail is
not part of the delivery, the unit can be suspended from
the ceiling with any distance between the ceiling and the unit

3   Counter-flow flap (2×)**
also serves as an internal coupling between the unit port
and the pipe bushing, part of the delivery

4   Mounting sheet metal template *

*   Part of the complete mounting kit
**   Part of the unit

5   Facade outlet
not a part of the delivery

6   Duct passage through the perimeter wall (2×)*
length 700 mm, ø 315 mm, shorten to
the required length during assembly,
install at a 2% slope towards the exterior,
fix with low-expansion PU foam,
min. diameter of the hole in the perimeter wall 350 mm

7   Duct DN315
(not included in the delivery)

ACOUSTICS

DUPLEX 1000 INTER-H

The acoustic power to surrounding with ePM10 50 % (M5) filters

| Acoustic power	Flow rate [m³/h]	External pressure [Pa]	L_{WA} [dB(A)]	L_w [dB]								L_{pA} 3 m [dB(A)]	L_{pA} 1 m [dB(A)]

DUPLEX INTER – BASIC UNIT

DUPLEX Inter-H

DUPLEX Inter-H
The basic compact unit configuration includes supply and extractor fans with free-running impeller and anti-vibration mounting, a removable counterflow heat recovery exchanger from thin-walled plastic panels, slide-out supply and extraction air filters (filter class ePM10 50 % (M5) or ePM1 55 % (F7)) and a condensate pan. The door provide easy access to all integrated components.

Fans
DUPLEX Inter-H units feature high-efficiency fans with free-running impeller and backward-curved blades. The fans comply with the requirements of the ErP 2015 European standard.

Heat recovery exchanger
The counterflow-type heat recovery exchanger is made of plastic and is highly efficient. The efficiency rates of plastic heat recovery exchangers in DUPLEX Inter-H are up to 93 %.
Bypass damper
A plate heat recovery exchanger bypass including actuator. When the bypass opens, the flow through the heat recovery exchanger automatically closes to eliminate heat transfer.

Electric pre-heater
2.2 kW electric pre-haters EDO.INT 2,2 are included as standard in the basic configuration of DUPLEX Inter-H unit. Preheating is operated by the unit's control system in such a way so as to prevent heat recovery exchanger freezing.

CO_2 concentration sensor
DUPLEX Inter-H units include a CO_2 concentration sensor as a standard basic configuration feature. It is an NDIR type sensor with infrared sensor and is integrated in the unit in the exhaust air intake. It enables coupled control based on current room occupancy.

DUPLEX INTER-H – OPTIONAL ACCESSORIES

- Electric **re-heaters EDO.INT** and **1,1 EDO.INT 2,2** are determined for supply air re-heating with power of up to 2.2 kW
- Designed for **integration in the unit** as an optional accessory to be installed at the set position inside the unit including the mounting frame

OVERVIEW OF ORDER NUMBERS FOR DUPLEX INTER-H

Item	Ord. No.	Item	Ord. No.
DUPLEX 770 Inter-H (incl. preheater, zinc, ready for casing)	Ord. No. A351001	**aTouch 4,3** controller with 4.3" color touch screen (for aMotion L, E regulation)	Ord. No. A145500
DUPLEX 1000 Inter-H (incl. preheater, zinc, ready for casing)	Ord. No. A351000	**aDot (B)** design controller with display – basic print – black (for aMotion L, E regulation)	Ord. No. A145550
Mounting kit – complete	Ord. No. A351010	**aDot (W)** design controller with display – basic print – white (for aMotion L, E regulation)	Ord. No. A145551
Mounting kit – small	Ord. No. A351009	**FK 1000 INT – M5**	Ord. No. A351090
Unit casing – white colour – main parts (770 IH)	Ord. No. A351025	**FK 1000 INT – F7**	Ord. No. A351091
Unit casing – white colour – main parts (1000 IH)	Ord. No. A351020	**FK 900 cartridge M5** (900, 1000 M,800 ME)	Ord. No. A132767
Unit casing – white colour – right side – full	Ord. No. A351021	**Electric heater EDO.INT 1,1 kW** (770 IH, for additional assembly)	Ord. No. A351013
Unit casing – white colour – right side – open	Ord. No. A351022	**Electric heater EDO.INT 2,2 kW** (1000 IH, for additional assembly)	Ord. No. A351011
Unit casing – white colour – left side – full	Ord. No. A351023		
Unit casing – white colour – left side – open	Ord. No. A351024		

CONTROL SYSTEM

As a standard feature DUPLEX Inter-H units include the top-of-the-range aMotion digital control system enabling remote access through a web-based server.

The aMotion type digital control module is the latest in operation control. It provides all basic functions and also includes a wide range of other inputs and outputs for connection to sensors. All optional components including the power supply are connected through the terminal board on the top section of the unit.

Also included as standard is a built-in smoke detector which disconnects the unit if smoke is drawn in.

AMOTION CONTROL SYSTEM FOR DUPLEX INTER-H UNITS

Control system „aMotion"	Standard functions of the aMotion control system

Standard functions of the aMotion control system
- EC fan speed control (according to mode settings)
- Automatic bypass damper position control (heat and cold recovery)
- Critical condition assessment and prevention based on temperature readings
- Weekly ventilation programme and temperature setting
- A built-in web server and Ethernet interface for communication with remote access through the Internet
- 4 contact inputs
- Power inputs for switching using 230 V voltage (4 inputs – 3 delayed, 1 immediate)
- An option to connect two CO_2 or relative humidity sensors, up to two sensors with a contact or 0–10 V input
- Outputs for controlling the electrical pre-heater and heater (impulse switching by 10 V) or hot-water air heater (controlled by 0–10 V signal)
- Operation of the unit in selected modes – balanced-pressure ventilation / night pre-cooling / overpressure ventilation
- Automatic switching between modes according to temperature settings
- Power control according to current CO_2 concentration including automatic power increase
- Automatic switching between heating and non-heating seasons
- Web server / ModBUS communication as a standard feature

BACnet / KNX converter
- An optional converter for connection to a parent system using a BACnet or KNX protocol

CO_2 concentration
- Optional sensor-based automatic operation – CO_2 concentration (one sensor supplied), another air quality, relative humidity or VOC sensor can be connected (optional accessory)

EPS
- Optional EPS signal connection (electronic fire alarm signal) for disconnecting the unit in the event of fire alarm

Smoke detector
- A built-in smoke detector is also a standard feature of the unit

aTouch (touch-screen)

aDot (touch-screen)

aSpace (internet interface)

CO_2 sensor (1× as standard)
